

DataStream[™] software

Baylis Medical's *DataStream*[™] data recording software database for pain management patient automatically records, saves, and prints detailed patient procedural reports.

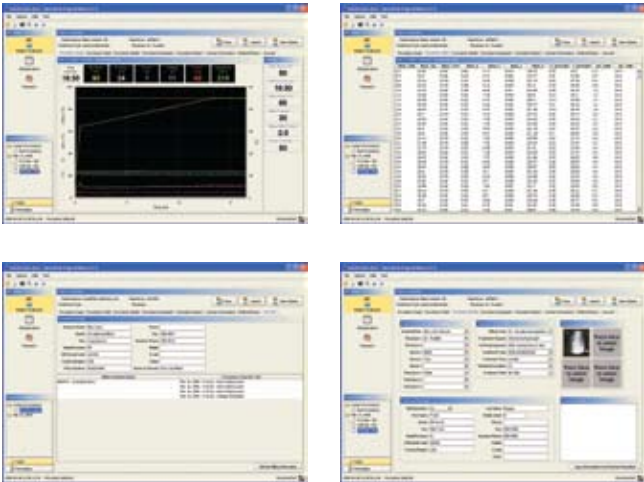

No Documentation.
No Reimbursement.
No more!

With Baylis Medical's
Innovative and
Highly Advanced
DataStream[™] Software

DataStream™ software

Structured, detailed information makes for quick, hassle-free reimbursement.

- ▶ The easy-to-use *DataStream™* data recording software links to the Baylis Medical RF Pain Management System to automatically generate electronic records and reports of all your RF procedures. This includes Standard RF, Pulsed RF, Multi-RF, Intradiscal, and Cooled-RF procedures.
- ▶ The *DataStream™* software's comprehensive reports include patient demographics, procedural information, and billing codes. In addition, fluoroscopic images can also be included in the patient's record and report.
- ▶ The *DataStream™* software reports can be saved in a Microsoft® Word format for easy printing, faxing, or e-mailing.
- ▶ The *DataStream™* software's database of patients' records can be searched according to selected parameters, and a corresponding report can be then generated with the search results.
- ▶ Pre-procedure and post-procedure pain scores can also be recorded for each patient.
- ▶ Additionally, one of the many unique *DataStream™* software features is its ability to track billing codes. Accurate codes increase the legitimacy of a claim and may make for shorter reimbursement cycles.
- ▶ The *DataStream™* software graphing display is fully customizable. *DataStream™* software is capable of graphing all RF Generator parameters including voltage and current stimulation, time, temperature, power and impedance.

DataStream™ software — Features

- 1 A comprehensive patient demographic database
- 2 Includes patient follow-up notes
- 3 Embed fluoroscopic images
- 4 Graphical display fully customizable
- 5 Automatic recording during procedures
- 6 Saves valuable staff time with quick and easy reporting
- 7 Generates reports instantly – print or export to Microsoft® Word
- 8 Query functions for research purposes
- 9 Ability to track billing codes
- 10 Compatible with all PMG V2.0 and higher
